

ADD CAPACITY TO MONOPOLES WITH ANDREW FOUR AND SIX-SECTOR MONOPOLE PLATFORMS

As mobile networks continue to expand and evolve, the need for additional site design flexibility to add antennas—and even sectors—to increase capacity becomes increasingly important. ANDREW understands this need and offers a full line of four and six-sector monopole platforms to fit various monopole sizes. Offerings range from base platforms with ring mount and triangles to full kits with top rails and antenna pipes included.

MTC3984 - Six-Sector Platform Kit

The MTC3984 enables carriers to co-locate six-sectors on a single mount structure with (3) 8-foot and (3) 6-foot Faces. The Six-Sector Platform is complete kit that includes ring mount, platform, top rail, kicker reinforcement kit, and (18) 96" antenna pipes.

MC-PK Series—base platform kits

The MC-PK Series four-sector low-profile monopole platforms are available in either 12-foot or 14-foot face widths and offer options for small (10-in to 30-in) or large (30-in to 60-in) monopoles. Optional top rail and kicker/reinforcement kits are also offered for additional loading capacity.

Atlas MC-PM Series—high-capacity platform kits

Atlas MC-PM Series high-capacity monopole platforms provide high-load performance, lower EPA, and reduced weight, all with a single-point tower connection—no kicker required. Analyzed for 180 mph wind loads and rated up to M2200R(1700)4-[6], the high-strength structural tubing (HSS) design of the Atlas minimizes weight on the tower. Face width options range from 10.5 to 14.5 feet and offerings include both base platform kits and kits with antenna pipes included. Optional top rail and “PVS” top rail support kits are also offered for additional loading capacity.
