

KwikClamp™ Hangers, C-Channel

for Fiber, Power, Hybrid and Coaxial

Bulletin 7866482 Revision A Page 1 of 1

Description

The KwikClamp hanger consists of a clamping body, which mounts on sections 40 x 22mm. They have two support blocks that surround the cable. The assembly is secured by compressing the blocks against the tower member with a bolt. Hanger kits are available for 1, 2, 3 or 4 cable runs.

Step 1: Remove the plastic block from the cable clamp.

Step 2: Insert the cable vertically into the cable clamp body, ensuring proper positioning.

Step 3: Reinsert the plastic block into the clamp to securely fix the cable in place. Repeat the steps 1-2-3 for each cable.

Step 4: Slide the assembled cable clamp into the rail channel and ensure it is fully seated.

Step 5: Tighten the self-locking screw to 5 N·m torque to complete the installation.

Recommended Maximum Hanger Spacing, 1.83 m with a Wind Speed of 137 km/h and No Ice.
