

ANDREW[®] announces exclusive partnership with Estech Magnetics

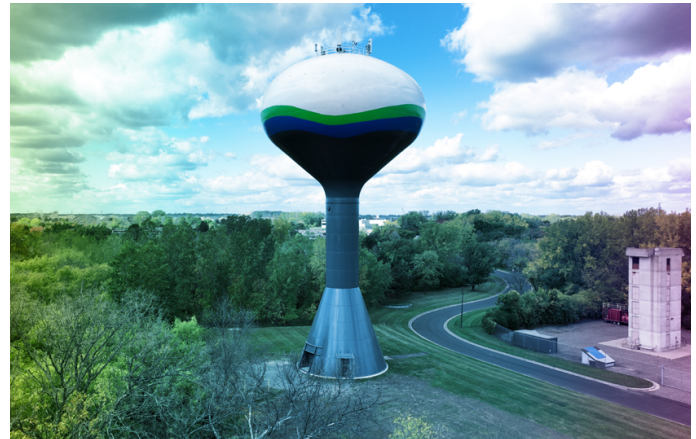

ANDREW, an Amphenol company, is proud to announce that it has entered an **exclusive partnership with Estech Magnetics**, the technological leader in advanced high strength magnetic bracketing systems. This strategic collaboration brings together two industry innovators to deliver revolutionary mounting and fastening solutions for telecommunications and beyond.

Advancing magnetic bracketing innovation

Estech Magnetics is widely recognized for its pioneering leadership in magnetic bracketing design and fabrication, including the development of the **world's largest magnetic bracketing fixture**. Their next generation magnetic technology delivers powerful, reliable, and repeatable fastening performance, even in the most demanding industrial environments.

Through this partnership, ANDREW and Estech Magnetics combine world class engineering expertise and advanced material science to enable safer, faster, and more efficient installation methods—helping customers reduce risk, save time, and improve productivity in the field.

Together, ANDREW and Estech Magnetics are elevating the future of high strength magnetic bracketing technology, creating new possibilities for telecom and industrial customers worldwide.

Broad industry applications

Estech Magnetics' product portfolio supports a wide range of industries and infrastructure applications, including:

- Water tanks and water towers
- Telecommunications infrastructure
- Oil and gas facilities
- Wind turbine systems
- Electrical grid installations
- Custom design and fabrication for specialized applications

About ANDREW

For more than 85 years, ANDREW has driven the evolution of wireless technology and remains focused on moving industry forward by providing simple, efficient, and sustainable wireless solutions. This portfolio includes durable and precise Structural Support solutions for critical networks that are engineered to meet TIA codes and are ideal for towers, monopoles, rooftops, and water towers. ANDREW also offers a full line of PIM-Guard[®] solutions that are optimized to prevent or mitigate PIM and maintain structural integrity for antenna mounts and RF cable installation accessories in the high-risk PIM zone around critical network equipment.

About Estech Magnetics

[Estech](#) is a world leader in magnetic bracketing design and fabrication. Supported by multiple US utility and design patents, Estech continuously evolves the capability of high strength magnetics in the wireless industry. Estech has internationally served the wireless market for over a decade with an expanding product line of tower solutions and custom design/fabrication offerings.
